JOSEPH BRECK & SON,
51 North Market Street
Quincy, on the Soiling of Ca
ILLUSTRATED FROM EXPERIENCE.

AT ALL TIMES something new and extraordinary
is to be found in the world of commerce. It is
to the stock-raiser of the older New England
where land is scarce and costly, it is yearly be-
coming necessary to resort to a new system. It is
the rule, and there is not room for the open
age when the population is so dense, and the
population, expedients must be resorted to for
the most of the limited area allowed in each
county of Joseph Breck & Son.

on the "Boiling of Cattle" must be regarded as a work of attention. Mr. Quincy was one of the most successful as well as one of the most practical farmers and stock raisers in New England, and for several years

practical experiments on the subject of his life, which are written in the clear, thorough manner characteristic of the man. The essays are brief, but the whole gives one a new and more definite idea of the value of the work. It is a book that should be read and advised that every intelligent farmer should be able to follow in the wake of Mr. Quincy's successful management. Fifty pages of the book are occupied with the interesting biography of Mr. Quincy by his great-grandson Quincy, which alone was well worth the purchase price. — *New York Evening Post*.
